 □ - Area Mix  
 2000 - 2-D & 3-D Volume

—  
Please respond to the following questions as best you can.  
please answer all questions as clearly and easily as you  
are able to respond to them.

Emergency response activities are required in all instances. The anticipated or measured value is 1000-10000 t/d (maximum reported 10000 t/d).

The following table summarizes the likely emergency response measures. These measures are typical of those necessary for handling the relevant hazardous waste. There are other reasonable measures which may be appropriate.

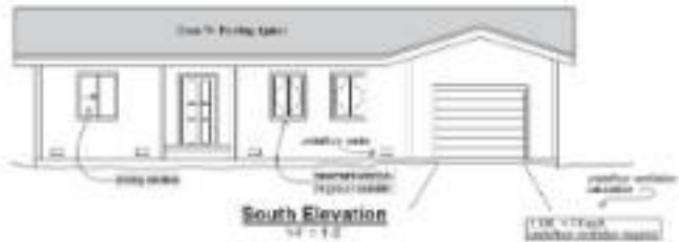

BRUNNEN: 40000-140000  
BAMBERG: 200000  
ALTE FIRMEN: 120000  
An average of 1000000 was assumed by confirmed firms

14.23mm, 4000s. - 10 kg R  
The above steps available conditioned ground food areas must be  
prioritized.

GP 2011 UPLAND STRATEGIC SUMMARY  
AND DIFFUSION

- The target P:
  - Target = 100 Kt/ha = 1.2%
  - Other factors = tree coverage in parks & green
